SASMIRA'S INSTITUTE OF DESIGN & TEXTILES(SIDT)

DIPLOMA IN WET PROCESSING TECHNOLOGY (DWPT)

Textile processing involves study of chemistry and manufacture of fibers, their chemical processing such as bleaching, dyeing and finishing. It further encompasses the study of chemistry as well as application of various kinds of chemicals, dyes, thickness and finishing auxiliaries which are used in chemical processing of textile fabrics and garments to provide them desirable properties like aesthetics, feel & functional use.

Duration: 6 months (Part - Time), August to January & February to July

Timings: Friday & Saturday - 9.30 am to 4.00 pm

Eligibility: SSC

Study Areas:

- Introduction to Textiles
- Preparatory Processes
- Dyeing and Printing of Textiles
- Testing and Quality Control in Textiles

DIPLOMA IN WEAVING TECHNOLOGY (DWT)

Weaving Technology offers the knowledge about weaving machinery and weaving process, inculcate weaving plant operations to improve working conditions and fabric quality. This course includes an overview of designing and drafting basic weave structures and complete instructions for good warping and weaving techniques. Fabric structure subject goes into greater depth to give thorough knowledge of all basic & advance weave structures. And also includes instruction in the use of weaving dobbie and jacquard.

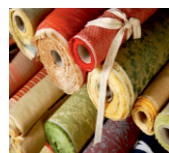

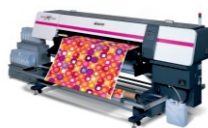

Duration: 6 months (Part - Time), August to January & February to July

Timings: Friday & Saturday - 9.30 am to 4.00pm

Eligibility: SSC

Study Areas:

- Introduction to Textiles
- Weaving Technology - I & II
- Fabric Structure
- Fabric Analysis
- Weaving Pilot Plant

CAREER OPPORTUNITIES

(DWPT)

- Marketing of Textile Machineries
- Plant Supervisor
- Garment Processing Unit
- Textile Process House
- Laundry House
- Dyeing Master

(DWT)

- Product Development Manager
- Plant Supervisor
- Textile Designer
- Fabric Marketing
- Fabric Trader
- Fabric Manufacturer
